riverbed® | XIRRUS

The Fastest and Most Secure Wi-Fi for Today's Digital Enterprise

Riverbed® Xirrus creates next generation Wi-Fi network solutions. Whether you need a simple, low cost network for 10 users, or you're running a distributed enterprise with 100,000 employees, Riverbed Xirrus Wi-Fi delivers fast, reliable, secure service you can count on for your digital enterprise... today, and as your needs change tomorrow.

Why Riverbed Xirrus?

Riverbed Xirrus Wi-Fi solutions are designed to dynamically adapt to the real-time demands of all-wireless connectivity, ensuring the quality of experience necessary to take full advantage of mobile devices in any environment. Riverbed Xirrus delivers Wi-Fi solutions that:

- Use application intelligence to match the network to desired business outcomes
- Use distributed control for superior resiliency and no single point of failure
- Ensure a superior user experience with solutions right-sized for all density needs
- Reduce equipment needs up to 75% to lower total cost of ownership

"The amount of money and time that we save by having to deploy so much less gear than we would with other solutions on the market—it's huge, it adds up to real savings, real money, real time."

-John O'Gara, Microsoft

Accessible
EasyPass services simply secure Wi-Fi access

Reliable
Prioritize applications to ensure performance

Scalable
2 and 4 radio AP's support all Wi-Fi density needs

Adaptable
Software-defined radios to future proof your network

## Software and Services

Xirrus Management System (XMS)

- Next generation management built around an intuitive, graphical interface
- Zero-touch provisioning allows plug-and-play installations in minutes
- Flexible options include cloud, on-premise and standalone management
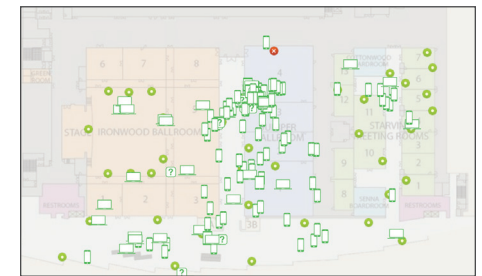

EasyPass

- Eliminates captive portals making Wi-Fi access simple for users and the IoT
- Provides secure BYOD with unique credentials controlled per user
- Single sign-on (SSO) with the Microsoft Office 365 and Google Apps ecosystems

Network Services

- Application Control provides application visibility and prioritization in every AP (no separate controller needed)
- Software defined APs provide 11ac on every radio for twice the performance of standard APs
- Riverbed Xirrus Positioning System tracks 100,000 devices in real-time and can locate any device in seconds
